SPEAK TO US ABOUT OUR CARRIER/TELCO PROGRAMS

WHAT CAN YOU EXPECT FROM ATMOS

The Atmos application has been developed by CallCabinet Corporation, market leaders in enterprise call recording solutions. Our wealth of knowledge and superior expertise in the call recording industry, provides you with an industry-first, cloud-based, compliant and secure call recording solution.

Whether you need to record calls for staff training, dispute resolution, compliance or security reasons, our call recording solution will give you complete flexibility, scalability and unlimited storage of calls, and other sensitive data without the need for any additional hardware or installation services.

All calls are 100% compliant and are individually secured, and encrypted at source with a rotating encryption methodology that is unique, and specific to each individual call.

All calls are stored on CallCabinet's cloud servers and are not only backed up, but can also be made redundant across multiple servers and geographical locations. Our logger meets compliance standards for PCI, MiFID II/MIFR, HIPAA, and many other regulations, ensuring that your company meets legislative needs.

Whether you have one location with five users, or a nationwide infrastructure with multiple branches and millions of calls, our compliant call logger is the solution for you! Call us today to take advantage of enterprise-class call recording in the cloud at a fraction of the price.

We look forward to hearing from you!
